

WHAT WILL WE LEARN TODAY?

Home learning: Monday 25th January

Literacy: reading nook

Use chairs, blankets, cushions and anything else you have to create a cosy reading area for you and your child to enjoy stories in.

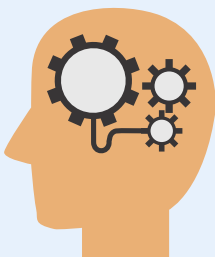

Research finds that children who have fiction read to them regularly find it easier to understand others. They show more empathy and have better developed theory of mind. Reading stories is also great for exposing children to new and interesting vocabulary.

Maths: tower numbers

Choose a number and ask your child to build a tower. Try and make a tower for one to five. Can you put these in order from shortest to tallest? Notice how the towers get taller or greater as the number gets bigger.

Comparing and ordering numbers help children recognise a number, its value and its relationship with other numbers as well as the mathematical concept of greater than and less than.

Personal, social and emotional development

Create a visual timetable by drawing images or using photographs of the different actions we do before going to sleep like brushing our teeth and reading a story. Display these where you and your child can refer to them.

Having a routine is helpful for children to understand the expectations of different parts of the day. Establishing a good bedtime routine will help form healthy habits and give confidence and independence as they will take pride in knowing the routine.
