

WHAT WILL WE LEARN TODAY?

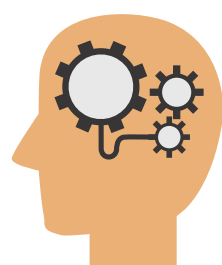

Home learning: Wednesday 10th February

Literacy: design your own planet

Imagine you could have your own planet with all your favourite things and people. What would you have there? Who would live on your planet? Design and draw your own planet with all your favourite things. Can you label some of the things on your planet?

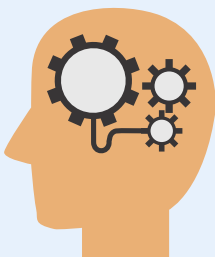

Through mark making and emergent writing you child is communicating their ideas, expressing their feelings and developing their imagination and creativity.

Maths: numberblocks

Watch the Numberblocks episode 'Ten Green Bottles' and practise taking away one each time. What do you notice about the remaining number each time one breaks?

Children begin to understand subtraction as taking away. Starting with take-away subtraction also helps children understand that subtraction is the opposite of addition. Since removing objects is the opposite of adding objects, they can concretely see and feel the difference between these two operations.

Physical development

See how many ways you can move your body across a room. Can you run, jump, roll across the room? Follow along with the Go Noodle video and run, duck, dodge and jump your way through avoiding all the obstacles.

Physical activity has been shown to improve memory and brain function as well as helping improve balance, coordination and posture. Regular physical activity has also been shown to improve emotional well-being.

Are you ready to learn and play? Click on the icons for play ideas in videos:
