

WHAT WILL WE LEARN TODAY?

Home learning: Tuesday 23rd February

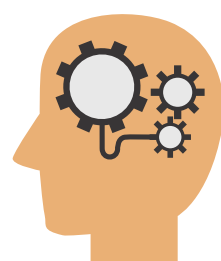

Literacy: Alphablocks

The Alphablocks helps children to explore phonemes and how they make words. Most of our children are working hard to blend sounds, made fun with familiar sounds in this episode.

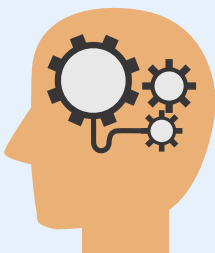

Oral blending is when we hear the sounds that make up a word and put them together to make the word. It's a tricky skill that requires lots of practice. It is also essential that children develop this skill before they try to blend sounds they can see.

Maths: match objects to numbers

Use your number cards to fifteen or two dice to randomly draw a number. Count the dots or identify the number on the cards and count out that many of an item. You could use your pompoms or sticks from your Keepmi boxes.

This activity practices counting with one-to-one correspondence, an extremely important skill in maths. This also provides children with experience of representing numbers in different ways.

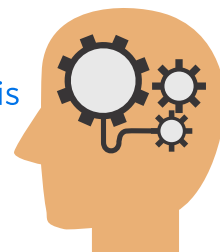

Personal, social and emotional development

Watch the video of Michael Rosen reading his poem "I am angry". Talk about what being angry feels like. How do they feel when they are angry? What helps them to stop feeling angry? Can they do this themselves or do they need help?

Recognises what feelings do to our body and thoughts is a really important part of learning to regulate how we show and control our feelings. This is a very important skill both for life and for learning. Poetry also helps us develop a wide vocabulary for feelings, which is very important in naming and sharing our feelings.
