# Year 1 Unit 7: Exploring <br> calculation strategies within 20 

Lesson 2: Doubles and near doubles

## If I know...then I know...

Monoa ©

Key learning: To use doubles to calculate near doubles

## double

## known fact

## near double

## number bond

## Rehearsing doubles

Double four is eight.
Four plus four is equal to eight.

Let's do now...
You will need a piece of paper, a pencil and some objects.

## Rehearsing doubles

First count out seven beads. Then another seven beads. I can see a group of ten beads and four more beads. That's fourteen. Double seven is fourteen.

I don't know what double seven
is, but I know it's seven plus seven. I can use 'Make ten'. I need to add three to seven to make ten, and then there's another four left to add from the seven. That's fourteen altogether. Double seven is fourteen.

## Using doubles to derive near doubles

$$
=4+5
$$

How did you calculate the missing number?

## Using doubles to derive near doubles

## Who is correct?

## To calculate $3+4$, l can

 double 4 and then add 1.To calculate $3+4$, 1 can double 3 and then add 1.

Key learning: To use doubles to calculate near doubles
Iflknow $2+2=4$, then I know...

Independent task

Use objects to make near doubles.

Remember the double first

## Using doubles to calculate near doubles

Do you agree or disagree?
Why?
