If I Never Forever Endeavor

Author: Holly Meade

This book was about a bird who didn't yet know how to fly.

The bird has to decide if it will try to fly, but it was not sure if it wants to. The bird thought, "If I never forever endeavor" then I won't ever learn. On one wing, he worries he might fail and on the other wing he thinks of how he may succeed. He worries that if he tries, he may get lost in the world. That makes him want to stay in his nest where he's safe.

I think this book would help other children to learn that trying new things can be scary, but sometimes when we try, we can find things that make us happy too. And this book will help others know that mistakes are okay and part of learning.

My favorite part is that the bird tried and learned that she could fly. I also liked that I read this book because it gave me a chance to talk to mom about making mistakes and how I don't like making them. Then I learned they are good and part of learning.

Boys and girls who are 3 to 8 years old would like this book because it teaches about trying a new thing and how it's important to get past being scared so you can learn new things.

I give the book 5 stars since I think it's important for other children to learn about courage.

Galaxy Zach: Journey to Juno Author: Ben Smith

Journey To Juno is the second book of the Galaxy Zack series. It is just as good as the first one. It's awesome!

Zack joins the Sprockets Academy Explorers Club at school. They fly on a special trip to Juno, a new planet no one has ever visited. Zack gets paired up with Seth, the class bully, and that's dreadful but Zack is excited when he finds a huge galaxy gemmite. A gemmite that large had not been found in 100 years! Kids will love this book!

Boys and girls will both like it. It's an easy chapter book with pictures on every page. I love the illustrations. I think ages 6-8 would like this but younger kids would like the story being read to them.

My favorite parts are the galactic blast game (it is similar to baseball except there are robots playing), recess at Zack's school where everything is 3-D holographic images, the rainbow river in a crystal cave on Juno, and the galaxy gemmite that Zack finds on Juno. I also loved when a life-size holographic image of his Earth friend appears in Zack's room because he calls him on a hyperphone. I give this book one hundred stars! There is a "to be continued" at the end so you have to read the next book see what's in store. I can't wait to find out what happens!!!
