Learn it - Advice & Arguments

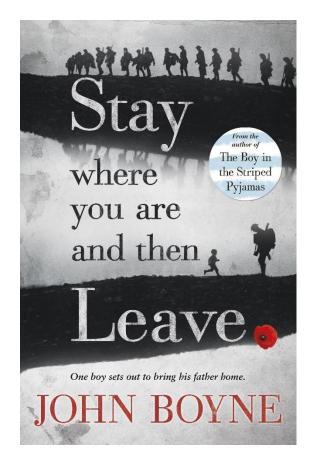

Everyone has opinions about what people should and shouldn't do and because of this, people often like to give others advice. This advice can sometimes be helpful and appreciated and sometimes not so helpful or appreciated. How we feel about the subject or situation usually determines how we will react to their advice.

Let's have a look.

Learn it - Advice & Arguments

If my opinion was that chocolate was bad and I advised you to never eat it again, some of you would be alright with this and some of you would not. This is because some of you like chocolate and some of you do not.

As I mentioned before, how we feel about the subject also determines how we feel about the advice.

Raise your hand if you would care if there was:

- No more football
- No more dancing
- No more playing in parks
- No more school
- No more war
- No more world hunger

Let's have a look at some advice
