Have your pen, pencil and working paper ready

Tuesday 12th January 2021

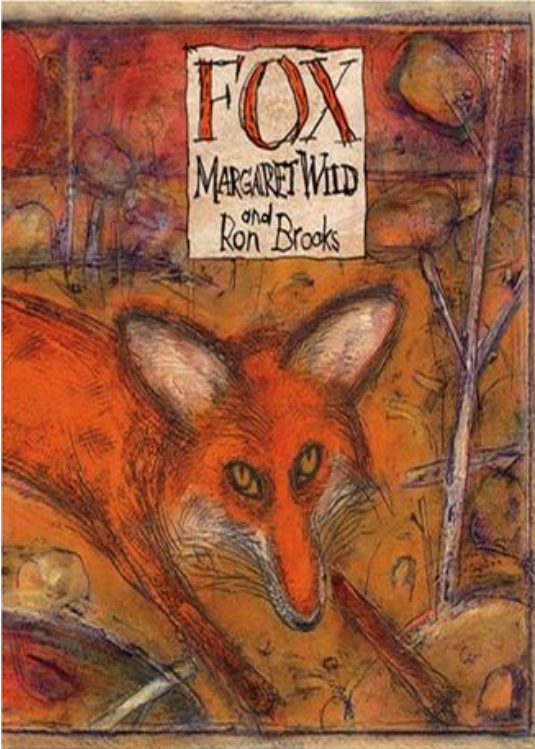

Science Forces

I will understand different types of forces

Key vocabulary:

- Forces
- Gravity
- Thrust
- Up-thrust
- Drag
- Air resistance

I will understand different types of forces

Introduction to forces

This afternoon, we are going to learn about forces.

First, you will watch a video, explaining different types of forces. When the video asks, click to continue to the next section. We are focusing on data this term so be sure to click on data when asked.

We will all come back together AS SOON AS THE VIDEO ENDS (it goes for 12 minutes) to complete the independent task. You will do this in breakout rooms. Write your answers in your book and upload them after the lesson.
