I will know how to infer ideas  
using evidence from the text.

Practice it:

Soon after entering the Weddell Sea, Endurance began to encounter pack ice, which resembled something close to a giant jigsaw puzzle of ice stretching for over 700 miles ahead of the ship.

Occasionally the foresail was reefed so that dangerous growlers might be spotted and avoided. Shackleton was fond of conning and working from the crow's nest, as he could see for miles. Animal life was abundant here, and included crab-eater seals, humpback whales, ringed penguins and many other seabirds.

How might the Weddell Sea present problems to the expedition?

Look at the picture and the text to help you

I will know how to infer ideas using  
evidence from the text.

Apply it:

1. What could have made the progress laborious?
2. Why do you think Hurley filmed breaking the ice open?
3. Why do you think the thick ice became a concern?

Use the double page spread – PACK ICE to answer the  
three questions.

Use both the text and the picture.
