

# Welcome to Year 3 live maths lesson

The session will begin at **11.15**

Turn your camera and microphone off please

Monday 22.2.21  
Live maths

## Year 3 Unit 8: Time

Lesson 1: Developing conceptual understanding of time

Mathematics  
**Mastery**

# Maths Meeting Monday

22.2.21

# Count in 5's with confidence

FIVE 5 five	TEN 10 ten	FIFTEEN 15 fifteen	TWENTY 20 twenty	TWENTY-FIVE 25 twenty-five		
THIRTY 30	THIRTY-FIVE 35	FORTY 40	FORTY-FIVE 45	FIFTY 50	FIFTY-FIVE 55 fifty-five	SIXTY 60 sixty

- Subtract 20 from 200.
  - 180
- What is the total of 38 and 41?
  - 79
- Double 23
  - 46
- What is half of 60?
  - 30

Which are the even numbers.

How do you know?

72

46

34

41

456

4 hundreds, 5 tens 6 ones

208

517

# Count in 5's with confidence

Do now

# Count in 5's with confidence

FIVE 5 five	TEN 10 ten	FIFTEEN 15 fifteen	TWENTY 20 twenty	TWENTY-FIVE 25 twenty-five		
THIRTY 30	THIRTY-FIVE 35	FORTY 40	FIFTY 50	FIFTY-FIVE 55 fifty-five	SIXTY 60 sixty	

Do now

# Count in 5's with confidence

FIVE 5 five	TEN 10 ten	FIFTEEN 15 fifteen	TWENTY 20 twenty	TWENTY-FIVE 25 twenty-five	
THIRTY 30	THIRTY-FIVE 35	FORTY 40	FORTY-FIVE 45	FIFTY 50	SIXTY 60 sixty

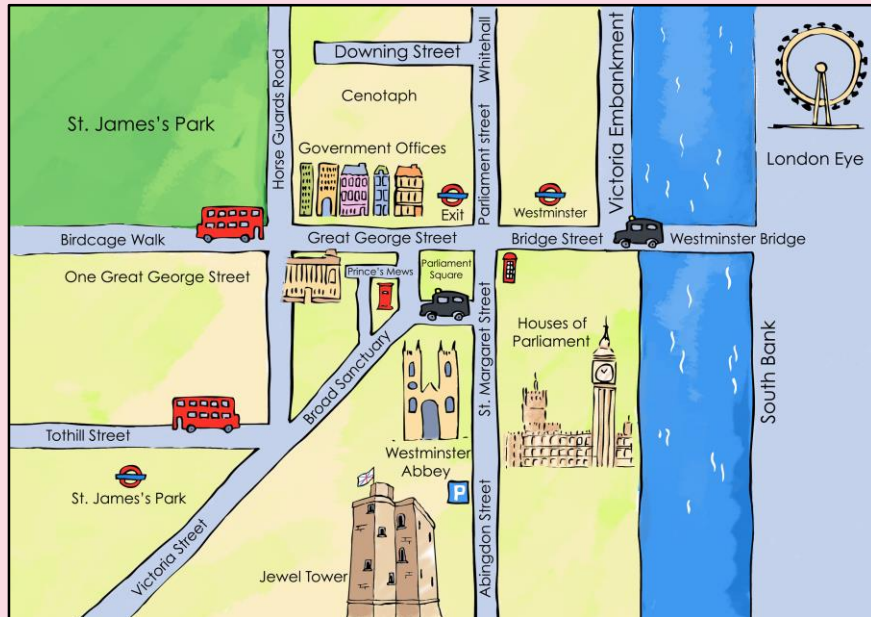

Do now

# Introducing the problem

Mr Slade is running a school trip to London. There are lots of things that he would like to do with his class but there is only so much time in the day

I will understand that clocks are measuring devices with more than one scale

Star Words

scale

quarter

hour hand

minute hand

\_\_\_ minutes to \_\_\_

\_\_\_ minutes past \_\_\_

What are these used for?  
How do we use them?

# What does each clock face show us?

What is the same?

What is different?

The numbers and the hand that reads the hours.

The numbers and the hand that reads the minutes.

A clock which shows us the hours and the minutes.

If we unravel the number scales on a clock this is what we would see.

The hours.

The minutes

These clocks only have the hour hand.  
Can you write down the time you think each clock might be showing?

I think this could be 11  
O Clock because the  
hour hand is pointing  
directly at the number 11.

We can split the clock into 4 equal parts.  
What do we call 4 equal parts?

**Quarters!**

So when the minute hand points to the numbers on each quarter we know that clock reads these times;

3 It is now **quarter past** the hour

So when the minute hand points to the numbers on each quarter we know that clock reads these times;

It is now half past the hour

It is now quarter to the hour

What do we know about 'minutes' hand?

When the minute hand points straight up to the 12. What does this say?

When the minute hand points straight down to the 6, it is **HALF WAY** around the clock.  
What does this say?

How many minutes are there in one hour?  
So that's how long does the minute hand take to travel all the way round the clock.

We do

What is the time on this clock?

Look at the hour hand.  
Look at the minute hand.

You do

What is the time on this clock?

Look at the hour hand.  
Look at the minute hand.

minutes to

minutes past

**Have a think, what do these clocks tell us?**

**They don't have an hour hand but we can read the minutes.**

**Are they minutes past or minutes to the hour?**

**A**

**B**

# Assignment

Go and find your assignment in the general folder.

Choose your chilli.

Click the Editing button so you can type straight onto your task sheet. If you can't write on the assignment sheet you can copy it onto paper and take a photograph of it.

## Fast finish challenge

If it takes 2 minutes to run around the playground  
How many seconds is that?

If it takes 4 minutes to walk home,  
How many seconds is that?

If it takes 10 minutes to read my book,  
How many seconds is that?

# Welcome to Year 3 live maths lesson

The session will begin at **11.15**

Turn your camera and microphone off please

Tuesday 23.2.21  
Live maths

## Year 3 Unit 8: Time

: Reading analogue time with  
increasing accuracy

Mathematics  
**Mastery**

# Maths Meeting Tuesday

23.2.21

1 2 3 4 5 6 7 8 9

- How many different ways can you make 15 using these digits?

With 2 digits?

With 3 digits?

CHALLENGE – can you use a different operation?

What fraction do these shapes show?

How do  
you know?

What's the time Mr Wolf?

Do now

$$8 \times 1 =$$

$$8 \times 10 =$$

$$8 \times 100 =$$

$$8 \times 1000 =$$

**What is the  
secret?**

I will know how to read analogue times

analogue

big hand (minute hand)

little hand (hour hand)

O'clock

half past

quarter past

Star Words

Which hand tells us the hour?

The little hand.

Which hand tells us the minutes?

The big hand.

**When the big minute hand points straight up to the 12  
it is O'clock**

The little hand reads the hour.  
So whichever number the little hand  
points to that is the hour.

When the big minute hand points straight up to the 12  
it is O'clock

Let's practise telling  
O'clock times.

You do

When the big minute hand travels HALF way around the clock it now reads half past

When the big minute hand travels HALF way around the clock it now reads half past

Let's practise telling  
Half past times.

You do

**When the big minute hand travels a quarter way around the clock it now reads quarter past**

**When the big minute hand travels a quarter way around the clock it now reads quarter past**

Let's practise telling  
Half past times.

You do

# Assignment

Go and find your assignment in the general folder.

Choose your chilli.

Click the Editing button so you can type straight onto your task sheet. If you can't write on the assignment sheet you can copy it onto paper and take a photograph of it.

Wednesday 24.2.21  
Live maths

## Year 3 Unit 8: Time

: Reading analogue time with  
increasing accuracy

Mathematics  
**Mastery**

Do now

$$5 \times 1 =$$

$$5 \times 10 =$$

$$5 \times 100 =$$

$$5 \times 1000 =$$

**What is the  
secret?**

I will know how to read analogue times to the nearest minute

analogue

nearest minute

big hand (minute hand)

little hand (hour hand)

interval

Star Words

We will be  
counting the  
minutes  
today.

What is the time?

It is ten past 12

? What is one more than  
10 minutes?

? *What is the time  
now?*

It is eleven  
minutes past 12.

What is the time?

It is eleven  
minutes past 12

In one more  
minute is will  
be...

Twelve minutes  
past 12.

The minute hand moves one more along the scale for every minute

Count with me

We do

The hour hand is between 7 and 8 so the time is between 7 o'clock and 8 o'clock.

The minute hand is indicating minutes past because it is before half past.

5, 10, 15, 16, 17 minutes past. It is 17 minutes past seven.

Yes, I have checked it and you are correct. The time is 17 minutes past seven.

You do

# We can also count the minutes in groups of 5's

Which do you prefer?

Counting on in ones?

Counting on in intervals of five minutes?

Counting in 5's is quicker!

Let's practice telling the times "past the hour" counting in 5's.

# Assignment

Go and find your assignment in the general folder.

Choose your chilli.

Click the Editing button so you can type straight onto your task sheet. If you can't write on the assignment sheet you can copy it onto paper and take a photograph of it.

# Welcome to Year 3 live maths lesson

The session will begin at **11.15**

Turn your camera and microphone off please

Wednesday 24.2.21  
Live maths

## Year 3 Unit 8: Time

Reading analogue time with  
increasing accuracy

Mathematics  
**Mastery**

# Roman numerals

Tell the time on Big Ben's clock to the nearest minute.

Why does the clock on Big Ben's tower look like this?

- Does anybody know which number system these symbols are from?
- If this is a clock face, can we work out what these strange I's, X's and V's are all about?

I II III IV V VI VII VIII IX X XI XII

Do now

I will know how to read analogue times to the nearest minute

**analogue**

**nearest minute**

**division**

**interval**

**clockwise**

**anti-clockwise**

**Star Words**

What is the time?

It is ten past 9

What we know about the minutes past?

How many minutes in 1 hour?

How many minutes in half an hour?

# It is half past 9

How many  
minutes in half an  
hour?

So that's 30 minutes  
past the hour of 9.  
Let's count the minutes  
in 5's to check this.

So what happens when the minute hand goes past half past?

When the minute hand gets past half-way, times are expressed as 'minutes to the next hour', rather than 'past the previous hour'

We now read the time counting how many minutes to the next hour.

We still count it in 5 minute intervals.

How many minutes did I count?

We do

Now let's count the minutes.

Look at the hour hand,  
is it still directly on the 9?  
Has it moved a little?

You do

Count the minutes  
in 5's from where it  
starts to where the  
next hour begins.

(from the number 9 to the number 12)

Another  
practise

Count the minutes  
in 5's from where it  
starts to where the  
next hour begins.

(from the number 10 to the number 12)

One more go

Count the minutes  
in 5's from where it  
starts to where the  
next hour begins.

(from the number 11 to the number 12)

Let's practice telling the times "past the hour" counting in 5's.

Let's practice telling the times.  
2 minutes to jot down these times

# Assignment

Go and find your assignment in the general folder.

Choose your chilli.

Click the Editing button so you can type straight onto your task sheet. If you can't write on the assignment sheet you can copy it onto paper and take a photograph of it.

# Welcome to Year 3 live maths lesson

The session will begin at **11.15**

Turn your camera and microphone off please

Thursday 25.2.21  
Maths live

## Year 3 Unit 8: Time

: Telling the time using a.m. and p.m.

Mathematics  
**Mastery**

# Maths Meeting Thursday

25.2.21

Double the number I point at

16

140

200

12

24

60

Read the number.

What would 100 greater than this number be?

What would 30 less than this number be?

Look at the array.

What could the multiplication number sentence be?

What could the division number sentence be?

Use coins to make £1, you can use as many as you need. Can you think of a way?

# Write the time to the nearest minute

Do Now

I will understand and correctly use a.m. and p.m. to describe time

**a.m.**

**p.m.**

**earlier**

**later**

**earliest**

**latest**

**chronological order**

Star Words

What do you do at 8 o'clock?

**What words and phrases help us to understand the time of day we are discussing?**

**What sorts of words help us to understand what time of day we mean if each time on the clock face occurs twice every day?**

Let's create a mind map of words to help us.  
You have 1 minute to come up with some time words.

# Mindmap

# Understanding how to use a.m. and p.m. accurately

How many hours are  
in 1 day?

1 day = 24 hours

**What time of day could this be?**

**five minutes past seven**

**ten minutes to six**

# Assignment

Go and find your assignment in the general folder.

Choose your chilli.

Click the Editing button so you can type straight onto your task sheet. If you can't write on the assignment sheet you can copy it onto paper and take a photograph of it.
