

I will know how to multiply numbers by 10 and 100

Each minibus can carry 10 people

Use this to write a calculation for each problem and solve it.  
One has been done for you.

How many people can 2 minibuses carry?  $10 \times 2 = 20$  people

How many people can 5 minibuses carry?

How many people can 3 minibuses carry?

How many people can 4 minibuses carry?

How many people can 7 minibuses carry?

How many people can 10 minibuses carry?

How many people can 12 minibuses carry?

How many people can 15 minibuses carry?

How many people can 18 minibuses carry?

I will know how to multiply numbers by 10 and 100

Each double decker bus can carry 100 people

Use this to write a calculation for each problem and solve it.  
One has been done for you.

How many people can 2 doubledecker buses carry?  **$100 \times 2 = 200$**

How many people can 5 doubledecker buses carry?

How many people can 7 doubledecker buses carry?

How many people can 4 doubledecker buses carry?

How many people can 10 doubledecker buses carry?

How many people can 11 doubledecker buses carry?

How many people can 2 minibuses and 2 doubledecker buses carry?

How many people can 4 minibuses and 5 doubledecker buses carry?

$$10 \times \underline{\quad} = 50$$

$$10 \times \underline{\quad} = 20$$

$$10 \times \underline{\quad} = 100$$

$$10 \times \underline{\quad} = 40$$

$$10 \times \underline{\quad} = 30$$

$$10 \times \underline{\quad} = 60$$

$$10 \times \underline{\quad} = 0$$

$$10 \times \underline{\quad} = 80$$

$$10 \times \underline{\quad} = 10$$

$$10 \times \underline{\quad} = 60$$

$$10 \times \underline{\quad} = 0$$
